NestorOPS - How it works?

A emphasis on communication, collaboration, integration and automation

Infrastructure Management

Automation is a critical element of DevOps. Our offerings include:

- Automated provisioning
- Scaling up of servers within minutes
- Bringing up servers in deploy real state

Environment Management

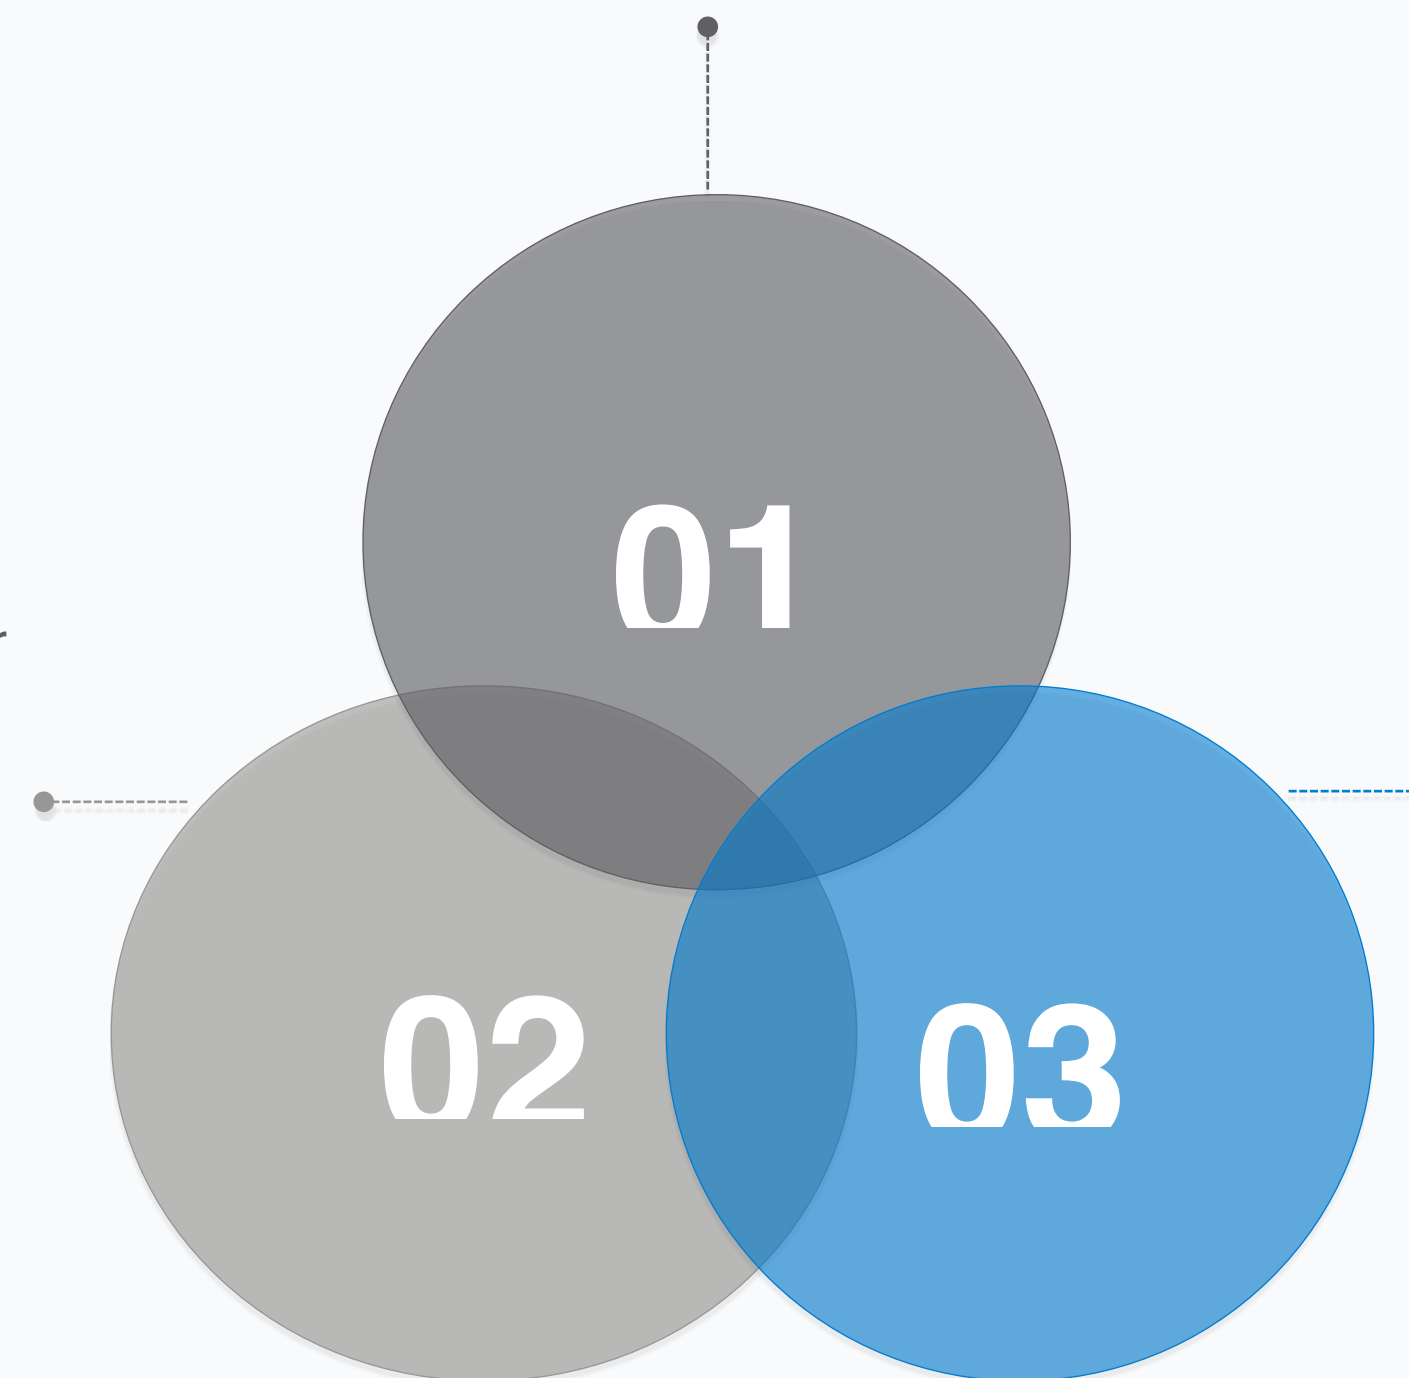

We help manage your code, automate your platforms and make your server and services ready for your consumers. Our offerings are:

- Elimination of configuration mismatch
- Automated, error-free, faster configuration deployment

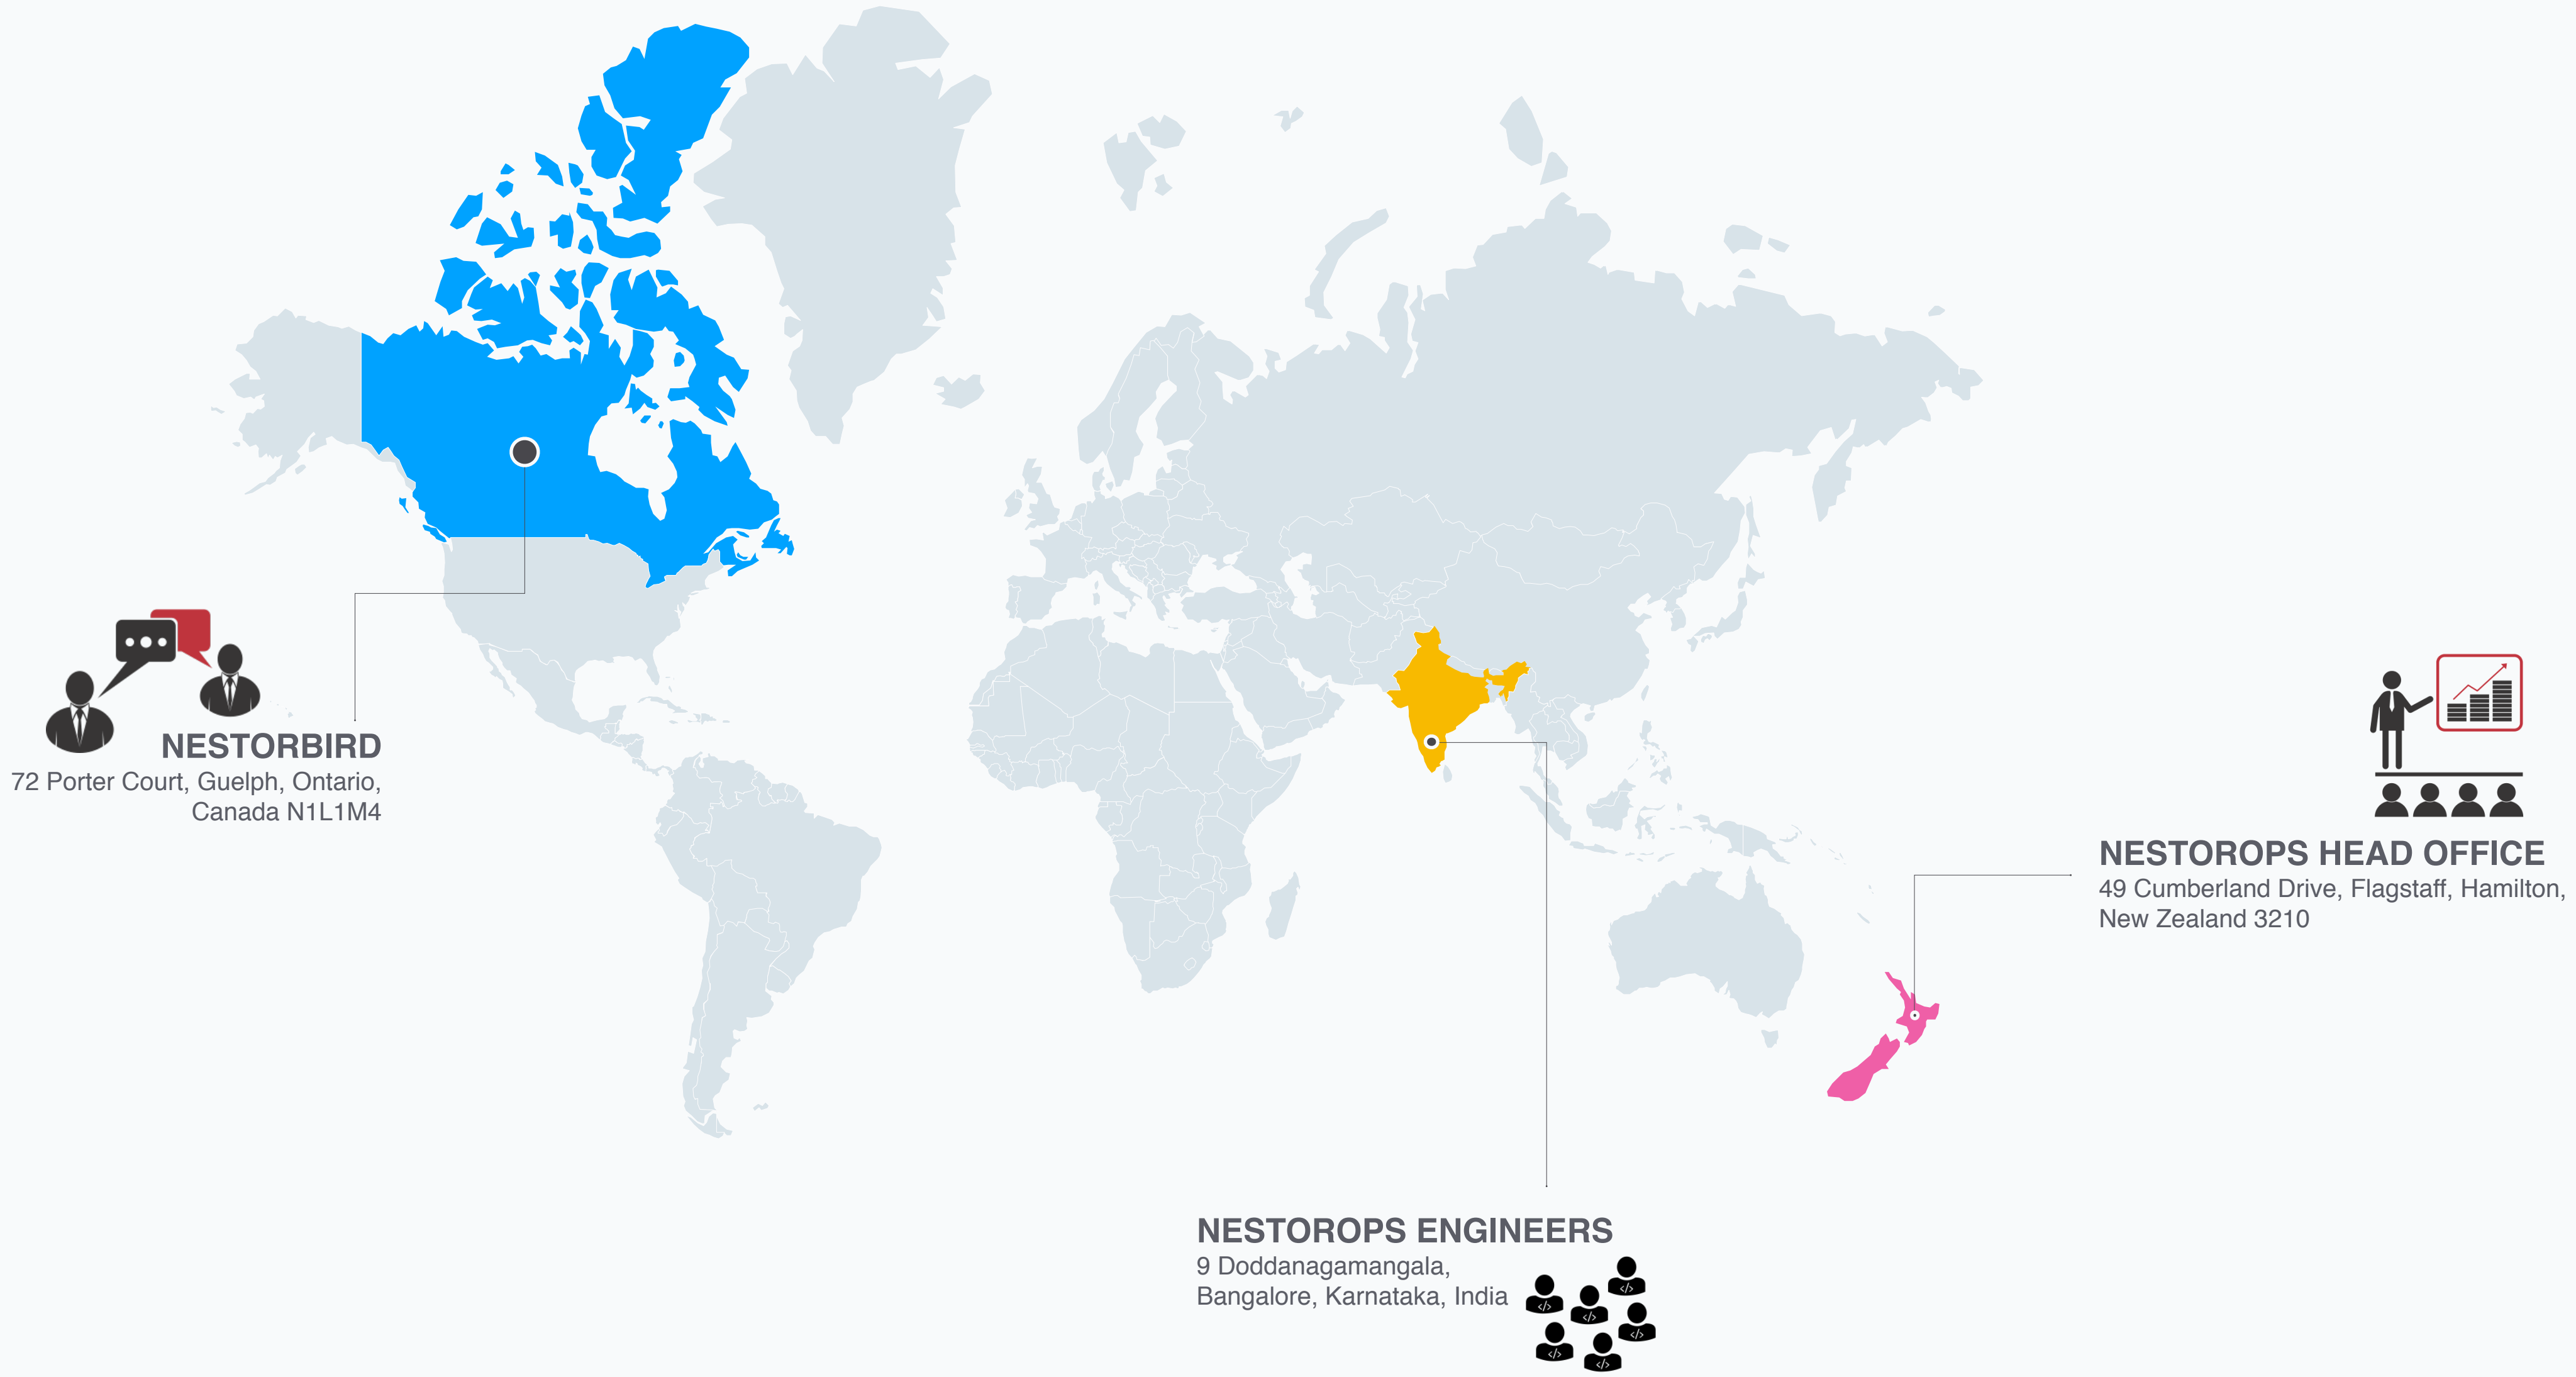

Deployment Automation & Orchestration

These days automating the deployment process has become a bare necessity. As a part of our Deployment Automation services we offer:

- Automated, error-free, and faster deployment
- Single click or continuous deployment
- Single-tool deploying in all environments & Deployment metrics

Building successful businesses since 2017
